Tamil Nadu, Ariyalur 621704

## Professional Summary

---

Trained fresher in Java full stack development with hands-on experience in Core Java, HTML, CSS, and JavaScript. Adept at front-end and back-end development, eager to apply skills in real-world projects. Completed internships focusing on web development and IOT solutions.

## Training

---

### Java Full Stack Developer Course

*Accord Info Matrix, Chennai, Tamil Nadu*

Jul 2024

- Trained in creating responsive web pages using HTML5, CSS3, and JavaScript.
- Developed back-end features using Core Java.
- Worked with MySQL for database management and query optimization.
- Collaborated on enhancing web layouts and UI design.

## Internships

---

### Junior Web Developer Intern

*ILife Technology, Trichy, Tamil Nadu*

12th Jun 2023 - 26th Jun 2023

- Designed and styled websites using HTML, CSS, and JavaScript.
- Added dynamic functionality to web projects using JavaScript.

### IOT Applications Intern

*Marcello Tech, Trichy, Tamil Nadu*

5th Jan 2023 - 7th Jan 2023

- Developed IoT-based projects using Node MCU to enable real-time data monitoring and control systems.
- Learned to integrate IoT sensors for automated security alerts.

## Education

---

### Bachelor of Engineering in Computer Science Engineering

Aug 2020 - May 2024

*Dhanalakshmi Srinivasan Engineering College, Perambalur, Tamil Nadu*

Graduated with 84%

---

## Projects

---

### Parent Linker

Developed a dynamic website that allows teachers to update attendance, marks, and leave details, with real-time SMS notifications to parents. Technologies: HTML, CSS, Core Java, MySQL.

### IoT-Based Anti-Theft Flooring System

Designed a home security system using Node MCU and piezoelectric sensors for real-time monitoring and alert notifications. Technologies: Node MCU, Arduino IDE, piezoelectric sensors.

### Product Tracker

Created a Core Java-based application with separate Admin (manage inventory) and User (browse and place orders) features. Technologies: Core Java, OOP principles, file handling, exception handling.

---

## Skills

---

### Core Java:

- Proficient in object-oriented programming concepts and design patterns.
- Developed robust applications by exception handling, optimizing string and managing complex array structures to ensure code efficiency and maintainability.
- Familiar with JDBC for database connectivity and data manipulation.

### HTML/CSS:

- Proficient in creating responsive, accessible web pages with HTML5 and CSS3.

### JavaScript:

- Skilled in adding interactive functionality to web applications.

### MySQL:

- Skilled in designing databases and writing SQL queries, including joins and constraints.
- Proficient in using subqueries and clauses like GROUP BY and ORDER BY.

### IOT:

- Familiar with IoT applications, including the basics of real-time sensor integration.

---

## Certifications

---

- Java Full Stack Development Course, Accord Info Matrix
- HTML, CSS & JavaScript Certification, Udemy
- SQL (Intermediate) Certification, HackerRank
- Introduction to Internet of Things, NPTEL Online Certification

---

## Personal Information

---

### Languages Known:

- English (Full Professional Proficiency)
- Tamil (Full Professional Proficiency)

**Date of Birth:** 31-12-2002
